PROFILE

Mechatronics Engineer graduated from the Universidad Autónoma de Bucaramanga (UNAB) with over three years of experience leading and developing projects in software, artificial intelligence, and innovative technologies. Known for my dedication to continuous learning, solving complex problems, and creating impactful technological solutions. I hold over 80 certifications from Platzi, focusing on machine learning, web development, and emerging technologies.

EDUCATION

MECHATRONICS ENGINEERING

Universidad Autónoma de
Bucaramanga (UNAB)

2016 - 2021

PLATZI

Certified in over 80 courses focused on machine learning, web development, artificial intelligence, Python programming, and advanced technologies.

EXPERIENCE

SOFTWARE AND MACHINE LEARNING DEVELOPMENT LEAD

Xactus

Nov 2023 - Present

- Lead multidisciplinary teams to develop innovative artificial intelligence solutions and functional products tailored to client needs.

DEVELOPMENT ENGINEER

Xactus

Jul 2021 - Nov 2023

- Designed and developed software for technological projects, including configuration and data visualization platforms.
- Actively participated in the design, manufacturing, and distribution of products.

COMPUTER VISION INTERN

K2 Ingeniería

Jan 2021 - Jul 2021

- Developed computer vision solutions for automation and visual data analysis, contributing to high-impact projects.

LANGUAGES

- Spanish: native
- English: Intermediate (B2 Certification from UNAB)

SKILLS

Programming Languages:

- Python
- JavaScript
- Matlab

Technologies and Tools:

- Langchain, LLM
- Tensorflow, Keras
- Flask, FastAPI, Django
- SQL, NoSQL
- Figma
- React, Next
- Docker, Kubernetes
- AWS
- Git
- Linux

Specializations:

- Artificial Intelligence
- chatbots
- Computer Vision
- Web Development
- Database administration
- Data Analysis(Predictive Modeling, Data Visualization)

I believe that technology is a powerful tool for turning ideas into impactful solutions. My philosophy revolves around continuous learning, tackling challenges with creativity, and collaborating in teams to foster innovation and contribute to a brighter future.

KEY PROJECTS

DATALOGGER WITH CONFIGURATION PLATFORM

Designed and developed a frontend and backend configuration tool for environmental data acquisition devices, enhancing usability and data monitoring.

ADAPTABLE VEHICLE COUNTING CAMERA

Developed a computer vision solution for detecting vehicles and people, implemented by Corporación Autónoma Regional (CAR) Bogotá to correlate traffic data with air quality metrics.

ENVIRONMENTAL VARIABLE FORECASTING

Implemented machine learning and deep learning models (LSTM) for accurate air quality predictions, generating predictive scenarios for decision-making.

ELECTRIC FRAUD CLASSIFICATION

Developed a program for ENEL Peru that increased fraud detection by 150%, optimizing energy recovery.

AUTOMATION OF PERIODIC REPORTS

Automated periodic reporting processes, reducing daily report generation time from 3 hours to just a few minutes, significantly increasing team efficiency.

CUSTOM AI CONSULTING FOR ENTERPRISES

Provided tailored AI consultancy to companies, including Antamina, advising on the implementation of AI tools to add value to their data and infrastructure.
